

EMULSION
TECHNICAL SPECIFICATIONS

TECHNICAL INFORMATION

Type	: Emulsion	
Physical properties	: Appearance	: White
	Viscosity	: 7500-12000 cps
	(BF RVF 5/10/27deg C)	
	Solids	: 50-53%
	pH	: approx. 3.0
	Flammability	: Not flammable
Operating conditions	: Ready for use as supplied. Dilute with water if required. Direct transfer from brush, roller, or glue spreader.	
Suggested uses	: Cross- linked adhesive specially designed for wood, bamboo and other lingo-cellulose based products. Suitable for cold press as well as hot pressing for veneer. HPL and paper overlaying, edge gluing, mortise-tenon joint, finger jointing and for post-forming applications.	
Precautions	: Store in closed containers to prevent drying out and contamination. Rotate stock first in- first out. Do not mix with other adhesives. Recommended to use the adhesive within 6 months.	
Package	: 50kg HDPE Drum/200kg MS Drum
