THERE’S A DOOR FOR YOUR EVERY CREATIVE EXPRESSION.
THE LEGACY OF CRAFTSMANSHIP

MASTERPIECES FROM THE HOUSE OF GREENLAM

Every artist needs a canvas. For Greenlam, every home is one. Greenlam is India’s No. 1, Asia’s largest and among the top 3 laminate brands in the world. Renowned all over the world, it stands as a symbol of excellence across 100 countries.

Since its inception, Greenlam has been a hallmark of exceptional artistry and unbridled passion for innovation. It offers end-to-end surfacing solutions with its expansive selection spread across laminates, compacts, veneers, engineered wooden floors, and engineered wood doors. With two state-of-the-art manufacturing facilities in the country, it is the first choice for individuals, architects, and interior designers when it comes to transforming living spaces. Not to mention, its vibrant designs add that touch of magnificence to any space.

With over 12,000 distributors and dealers along with a robust team of around 3,200 professionals, Greenlam is just a call away to turn your spaces into an unforgettable experience.

We work in harmony with our environment. Greenlam thinks and acts to save and preserve nature in its pristine form by ethical sourcing of its raw materials from the world over. Along with this, the technology that is used to create the products is environment friendly and the waste is fully recyclable, which ensures a minimal carbon footprint. The biggest testimony to this fact is Mikasa Doors & Frames.

OUR OTHER BRANDS

01 02
Mikasa Doors & Frames have been designed for every need and purpose. Be it from the point of view of an Architect, an Interior Designer, or a home owner, we have a door for everyone.

**DOORS & FRAMES OFFERINGS**

**FIRE RATED DOORSETS**

Mikasa Fire Rated Doorsets provide a safe exit in case of fire emergency by preventing the spread of fire and smoke. It’s an integrated fire protection system with a fire door leaf, frame, and fixtures that comply with BS476 Part 22 and carry Exova, BM Trada, Q-Mark certification and IS:3614.

Available in fire rating of FD30, FD60, FD90, and FD120 with thickness of 44 mm, 54 mm, and 64 mm respectively.

**NON-FIRE RATED DOORS & DOORSETS**

These doorsets are made of 3 layers with a solid core/tubular core which is sturdy and load bearing. It has various applications in residential and commercial spaces, where fire doors are not mandatory. Unfinished door leaf can also be supplied with either veneer or HPL facing, which can be resized up to 10 mm on each side.

Available in varying thickness of 32 mm, 35 mm, 38 mm, and 44 mm.

**SPECIALITY DOORSETS**

- **Radiation Shielding/Clean Rooms:** Constructed for areas exposed to high levels of radiation such as hospitals and laboratories. These are available with or without vision panels.
- **Acoustics:** Designed to achieve optimum levels of sound reduction in the range of 29-45 dB with thickness varying between 38 mm to 44 mm.
WHY CHOOSE US?

Innovation is breaking away from tradition. Rules create uniformity. Breaking away from the norm results in something unique.

When we think of a door, we think of the wood and the craftsman behind it. In a market served by traditional flush doors, Mikasa Doors & Frames introduces a revolutionary concept. It offers factory finished doorsets to suit every room and purpose.

Mikasa Doors & Frames are available in a variety of configurations be it individual leaf, frame or a complete doorset solution. All the components such as door leaf, frame, and architectural ironmongery work together as a unified product, meeting certified performance levels. The doors and frames are carefully selected and tested to provide a coordinated, fit-for-purpose, certified package, offering comprehensive product performance and life cycle resilience.

Complete door solutions as doors, frames, and accessories are shipped from factory as a fully finished single doorset. Mikasa doors are supplied just-in-time to match the on-site progress, which in turn cuts the risk of advanced buying, which could force a change in aperture size.

The factory finished doors and frame don’t require resizing. The product looks new for a lifetime as the factory finish lasts for a long-time.

The longevity of Mikasa doorsets and their superior finish is a result of high quality of imported raw materials and the premium quality of Decowood Veneers and Greenlam Laminates. The hardware also comes with a Mikasa badge which guarantees a long-life.

Mikasa Doors & Frames is backed with up to 5-year performance guarantee. Superior product design, manufacturing, and installation processes result in a lifetime performance with minimal maintenance.

© Wood being a natural product, the grain, shade, and texture may vary.
GREEN CONSCIENCE

We, at Akasa, understand our responsibility towards our planet, and thus invest in sustainable harvesting of trees. We encourage an environmentally conscious workplace by ensuring that our products meet the strictest green building standards. In working towards a sustainable future, we warrant that our wood is ethically sourced.

Akasa Doors & Frames only use wood which is sourced from legal, certified, and sustainably managed forests. Our production consists of rigorous quality control checks at every level of the process to meet the international standards of the Forestry Stewardship Council. The integration of technology and creativity has always been our priority and how each step we take towards a beautiful home, ensures a clean and green planet too.

The FSC certification has helped us establish a leaner and more efficient model for sustainable growth, which we have accredited with the Indian Green Building Council for our quality management systems.
COMPLETE
DOOR
SOLUTIONS

Innovation must serve a need. If it doesn’t, innovation is pointless. Mikasa Doors & Frames have been designed to suit every need and purpose. Their design and performance have been crafted to match a wide range of sectors and applications.

LEISURE OR RECREATION

Mikasa Door & Frames with their wide variety of colours and designs offer easy and ready solutions to leisure and recreation facility structures.

PUBLIC SECTOR

Public sector buildings require doors which provide high performance, functionality and security. These paramount criteria are easily fulfilled by Mikasa Doors & Frames. These include Safety Exit Fire Doorset, Electric Duct Doors, Shaft Doors, Boardroom and Conference Room Doors, Storeroom Doors, etc.

HOSPITALITY

Hospitality doorsets play a critical role in making a good first impression - at hotels, restaurants, and other buildings in the customer service industry. From restaurant entrances to hotel room doors, main fire doors, doors for guest rooms, toilets or more, that Mikasa, for high performance and aesthetically pleasing hospitality doors which fulfill the needs of any establishment.

RETAIL

When it comes to retail outlets, the look is paramount. Mikasa Doors & Frames with their unique offerings give every space a different look along with safety and convenience.

EDUCATION

With unlimited colours and finishes, Mikasa Doors & Frames transform institutions of learning into a fun place. The doors and frames meet every performance, safety, and compliance guidance of competent authorities to create inspirational learning environments. Specialty Doors for libraries, lab rooms, washrooms and classroom doors are also available.

HEALTH

Mikasa Doors & Frames bring together functionality, design, and hygiene to offer a complete solution to the health sector. Easy to clean, antibacterial properties, radiation protection, and flush glazing options make them the ideal choice for Architects and Interior Designers associated with the health sector.

COMMERCIAL

Mikasa Doors & Frames give Architects and Interior Designers complete freedom when it comes to creating commercial spaces. The wide range of veneers and laminates in a multitude of colours have been created to fulfill every design plan. Mikasa doorsets are available with the option of vision panel and louvre cutout as well.

RESIDENTIAL

Be it high-end homes and penthouses or high volume for modern living, Mikasa Doors & Frames offer ready and ideal solutions for all types of residential projects. Bespoke interior doorsets in contemporary designs are available to meet the building’s interior design scheme.

RETAIL

When it comes to retail outlets, the look is paramount. Mikasa Doors & Frames with their unique offerings give every space a different look along with safety and convenience.

HOSPITALITY

Hospitality doorsets play a critical role in making a good first impression - at hotels, restaurants, and other buildings in the customer service industry. From restaurant entrances to hotel room doors, main fire doors, doors for guest rooms, toilets or more, that Mikasa, for high performance and aesthetically pleasing hospitality doors which fulfill the needs of any establishment.

RETAIL

When it comes to retail outlets, the look is paramount. Mikasa Doors & Frames with their unique offerings give every space a different look along with safety and convenience.
The door leaf used in Mikasa doorsets are aesthetically crafted to perfectly fit into your design. Our door leafs are available in a variety of designs & finishes such as laminated, painted, or veneered, any of which will elegantly complete the look you are striving for. These are available in varying thickness of 32mm, 35mm, 38mm, 44mm, 54mm, and 64mm. For doors which have more than 7 ft. height, a minimum thickness of 38mm is recommended. For special requirements like Fire Rated Doorset, the usage of 44mm, 54mm, and 64mm door leaf thickness to achieve FD30, FD60, FD90 and FD120 ratings respectively is mandatory. It’s recommended that doors and frames must be installed as a complete set to comply with test evidence.

The core is pre-tested for fabrication of both fire and non-fire rated doors, which offer a combination of strength and stability. The core undergoes various durability tests with respect to static torsion, soft & heavy body impact, slamming shut & open, closure against obstruction, resistance to jarring and vibration, operating forces, and cycling.

**Core**

Mikasa employs two types of cores for its door leaf:

- **Solid Particle Core**: These are high performance solid core fillers made up of triple layer density particle board imported from Germany and have dual core layers of high density wood.
  - Density: 500-850 kg/m³

- **Tubular Core**: These are made up of a high performance tubular core with DL stile and rail. The structure provides extreme stability to the door leaf.
  - Density: 520 kg/m³
Mikasa Frames are factory finished to match the aesthetic look of the door leaf and give a coordinated look to your vision. Mikasa offers frames with various core options so as to make them suitable for Fire rated and Non-fire Rated applications. In case of Fire Rated Doorsets, frames are made using high density hardwood to match the fire rating of the door leaf. Intumescent strips are rebated onto all 3 sides of the door frame which expand to seal the gap between the door and frame to prevent the spread of fire and smoke.

Mikasa frames are made using best quality wood which is kiln dried, imparting its tolerance to seasonal variations in weather. These frames are available in varying surface finishes be it natural, stained, painted, laminated, or veneered. To further enhance the look, architrave is used which covers the gap between wall and frame. Architrave size can be customized as per customer’s requirement.

Matching hardwood lipping of 6/10/12mm thickness is fixed using specialised edge banders to fully seal the door leaf from all 4 sides. This prevents bending, bowing, and moisture ingress during monsoons. The factory finish results in an attractive and sturdy look.

ARCHITRAVE SIZE CAN BE CUSTOMIZED AS PER CUSTOMER’S REQUIREMENT.

Wood Lipping

Matching hardwood lipping of 6/10/12mm thickness is fixed using specialised edge banders to fully seal the door leaf from all 4 sides. This prevents bending, bowing, and moisture ingress during monsoons. The factory finish results in an attractive and sturdy look.

NOTE: Every effort is made to colour match hardwood door lipping, frames, etc. with veneers and high pressure laminates on door facing. However, as timber is a natural material, variations in shade and colour may occur.

Choose from the various options of surfacing material to match your style and interiors. You can choose from an exhaustive collection of Decowood Natural Veneers, Greenlam Laminates, or paint finishes.

Enginedered Frames

Engineered frames are made with a door stopper. The stopper is also made from matching material and is 15mm thick. It is positioned so that the head of the anchor bolts is covered. Engineered frames are available in following options:

- LVL Frame: Laminated Veneer Lumber frame is an engineered wood product that uses multiple layers of thin wood assembled with adhesives which imparts extreme strength. Density: 520-950 kg/m³

- Hardwood Frame: This door frame is made up of solid hardwood. Density: 650-950 kg/m³

Rebated Frames

Rebated frames are made using solid hardwood and are extremely stable. Density: 650-950 kg/m³
Decorative Veneers/Laminate: With Mikasa doors, you can choose from the extensive collection of Decowood Veneers. These highlight the simplicity and natural beauty of wood. Pre-polished in the factory using a UV process, this ensures uniformity and longevity.

Decorative Polished/Stained: Both engineered and solid rebated frames can be stained to match the veneer/laminate specified for the door leaf. Solid rebated frame can also be provided in natural finish.

Paint Finishes: Mikasa doors can be supplied fully painted in any colour within RAL or any international standard.

Decorative Veneers: With Mikasa doors, you can choose from the extensive collection of Decowood Veneers. These highlight the simplicity and natural beauty of wood. Pre-polished in the factory using a UV process, this ensures uniformity and longevity.

Decorative Laminates: Available in solid colours, wood patterns, metallic finishes and textures, the ceaseless collection of Greenlam Laminates lets you bring your vision to life.

Paint Finishes: Mikasa doors can be supplied fully painted in any colour within RAL or any international standard.
Combining performance and non-performance usability, the ironmongery provided with Mikasa Doors & Frames creates visual compatibility, enhanced aesthetics, and offers the highest levels of standard compliance. The installation process is a simple exercise that maximises the benefits of factory preparation.

Mikasa Doors & Frames provide a complete doorset package with each product chosen to meet all technical requirements. External items like door handle, latches, flush bolts, door stopper, etc., are also available.

Mikasa appreciates the uniqueness which our patrons demand and try to provide solutions to every specific need. This gives you the flexibility to choose your own doorset and ironmongery package to suit your particular project needs.

Mikasa employs advanced C N C machinery for recessing ironmongery like hinges, locks, door seals, door closer, etc.:  
- Pre-fitted hinges meet Mikasa’s quality standard  
- Reduces installation and hand-over time on site
Mikasa Doors & Frames are available in a range of configurations and handing to fulfil all project requirements. They are available in single and double leafs (equal or unequal pair) and with both clockwise & anti-clockwise swing.

**CONFIGURATIONS**

- Single leaf
- Single leaf & overpanel
- Single leaf & fanlight
- Double leaf
- Double leaf & overpanel
- Double leaf & fanlight
- Unequal pair double leaf & overpanel
- Unequal pair double leaf & fanlight
- Unequal pair double leaf & fanlight

**HANDLING**

- Primary leaf clockwise
- Primary leaf anti-clockwise
- Double swing
- Clockwise Anti-clockwise Double swing

Mikasa Doors & Frames adhere to all the global quality standards. However, there are certain measures which need to be followed to ensure its longevity.

- Mikasa Doors & Frames must not be installed until all wet trades on-site are completed. Kindly refer to installation guide for the exact process of storage, installation, and damage protection.
- As a finished product, the installation of Mikasa Doors & Frames must begin only after one coat of paint has been applied on walls. Even after installation, Mikasa Doors & Frames must be protected until the site is occupied and becomes functional.
- Mikasa Doors & Frames are made as per actual measurements. In case the flooring or plastering is not completed, it would not be possible to take measurements which may lead to unavoidable delays.
- Hinges, lock bodies, and flush bolt bodies can be factory recessed as per client requirement.
- Mikasa Doors & Frames are carefully wrapped and protected to avoid damage during transportation. To simplify handling, doors, and frames are packaged separately.

**EASY TO INSTALL**

- For paint and laminates, a soft duster or soap and water will usually clean the surface satisfactorily to maintain the appearance of painted and laminate facings. For veneer doors, damp cloth is sufficient to clean the surface. Powder-based cleaners, bleaches, or ammonia should not be used as they can leave a residue unless carefully rinsed off.
CERTIFICATIONS AND COMPLIANCE

Fire & smoke resistance is one of the most fundamental performance criteria for Mikasa. All our fire doorsets comply with the Exova, BM Trada, Q-Mark certification.

Mikasa Doors & Frames are FSC certified which ensures that all our raw materials come from responsibly managed forests. We only use ethically sourced wood without disturbing the natural balance of our ecosystem.

Exova BM Trada, Q-Mark Certifications
Mikasa is the only doorset manufacturer in India which is fully certified by the BM Trada intensive Q-Mark scheme and comply to BS476 Part 22 of the approved documents. Our FD 30, 60, 90, and 120 minutes doorsets carry a tamper evident and fully traceable label incorporating clear and essential information.

ISO 18001
We operate a health and safety management system which complies with the requirements of ISO 18001.

ISO 9001 & 14001
We operate a quality management system which complies with the requirements of ISO 9001:2008 & ISO 14001.

DURABILITY
Mikasa Doors & Frames meet the requirements of EN 1192 for strength classification and EN 12400 for mechanical durability.

RADIATION
Mikasa Doors & Frames meet the requirements with regard to lead thickness and radiation levels.

SECURITY
Mikasa has developed a physical attack test procedure and provides doorset solutions for situations requiring resistance against forced entry, vandalism and most importantly, burglary.

WEIGHT & MOVEMENT
Mikasa Doors & Frames meet the requirements with regard to lead thickness and radiation levels.

QUALITY CONTROL
We have implemented 100% pre-delivery inspections to ensure all products are checked for all manufacturing defects, ensuring the highest quality standards.

SOUND
Part E of the approved documents 2013 includes quantifiable acoustic performance levels. Designer doorset solutions offer up to 45dB sound reduction and appropriate smoke seals are automatically included with our fire doorsets to suit performance requirements.

MANUFACTURING CAPABILITIES

2 STATE-OF-THE-ART MANUFACTURING FACILITIES
Behror (Raj) & Nalagarh (H.P)

25 YEARS OF MANUFACTURING EXPERTISE

146,000 SQ. M. OF MANUFACTURING SPACE

100+ COUNTRIES OF BRAND PRESENCE

* Mikasa Doors & Frames are Manufactured at Behror (Rajasthan)
Door leaf cores are available in varying thickness of 32mm, 35mm, 38mm, 44mm, 54mm, and 64mm. Mikasa employs two types of cores for its door leaf:

**SOlid Particle Core**
- High performance triple layer density core
- Density: 500-850 kg/m³

**Tubular Core**
- Extremely stable core with LVL stile & rail
- Density: 520 kg/m³

**Door Frames**
Available in single & double leafs (equal or unequal pair) and with both clockwise & anti-clockwise swing.

**Rebated Frame**
- Solid Hardwood Core
- Density: 650-950 kg/m³

**Engineered Frame**
- Solid Hardwood Core
- Density: 650-950 kg/m³
- LVL Core
- Density: 520-850 kg/m³

Matching hardwood lipping of 6/10/12 mm thickness is fixed using specialised edge banders to fully seal the door leaf from all 4 sides.

**Mikasa** employs advanced CNC machinery for recessing ironmongery like hinges, locks, door seals, door closer, etc.
- Pre-fitted hinges meet Mikasa’s quality standard
- Reduces installation and hand-over time on site

**Facing or Finishing Material**
- Choose from an exhaustive collection of Decowood Natural Veneers, Greenlam Laminates, or Paint Finishes.

**Intumescent Strip**
In the incident of fire or when the temperature reaches 180° Celsius, the intumescent strip expands to seal the gap between the door and frame to prevent the spread of fire and smoke.

**Ironmongery**
All Mikasa doorsets come with pre-fitted hardware and accessories like hinges, locks, handles for seamless functioning and a long life. Mikasa employs advanced CNC machinery for recessing ironmongery like hinges, locks, door seals, door closer, etc.

**Configurations and Handing**
Available in single & double leafs (equal or unequal pair) and with both clockwise & anti-clockwise swing.
