INTRODUCING
DURA COLLECTION

Greenlam is a surface décor solutions company that offers a wide range of Laminates, Compacts, Veneers, Engineered Wooden Floors, and Engineered Wooden Doors to more than 100 countries. Greenlam has been manufacturing products which perform beyond comparison. Our simultaneous efforts to preserve the environment has made us India's No. 1 and Asia's leading brand of laminates for years now. From developing technology to designs with superior functionality, Greenlam has left its mark all around the globe.

Mikasa Doors & Frames are a splendid consolidation of beauty and excellence which are engineered to perform. These doors and frames can be carved in any size and dimension to fit your need and space. Our premium quality doorset collection is manufactured by integrating innovation, technology, and creativity to deliver the best of the best to you.

CERTIFIED BY:

DURA INTRODUCTION

DURABILITY

ENGINEERED TO COMPETE WITH TIME

- **LONG LIFE:** A strong and durable doorset collection made from a highly stable and moisture resistant material. The blend of this modern material and technology imparts long life and moisture resistance to the doorsets. Not only that, this advanced material also prevents the expansion or contraction of your doorsets.
- **ALL WEATHER DOORS:** Varying weather conditions can be brutal. To keep up with vagaries of the weather, Dura doorsets have a comprehensive 6-side protection and provides high impact resistance. The LVL frame shields the doorsets against temperature and weather variations to prevent bending, bowing, and moisture ingress.
- **TERMITE & BORER RESISTANT:** The doorsets are as durable as they are aesthetically appealing. The engineered tubular core and LVL frame make the doorsets way less susceptible to termite attack resulting in a longer life.
- **EASY MAINTENANCE:** The smooth laminate surface of the doorset makes it easy to clean and maintain.
- **INDOOR AIR QUALITY:** The MDF cross band used in the door complies to E1 emission standards resulting in a better indoor air quality. The resin adhesives employed in the construction of the Dura doorsets are urea-free. Thus, better for both people and the planet.

RAVISHING

A LOOK THAT SPEAKS ONLY BEAUTY

- Our state of art manufacturing processes follow latest European practices. This leads to rich colour, lustre, superior aesthetics, excellent fit, and finish. Unlike traditional doors which have to be finished on site for the door and frame to match, Dura doorsets come factory finished with matching look.

ADAPTIVE

DOORSETS THAT ARE HIGH ON FREEDOM

- Mikasa Doors & Frames are factory finished, made to fit, and don't require resizing. Mikasa also gives you the power of customizing your doorsets, be it in terms of size, preference, or colour palette. The exhaustive range of laminates to choose from makes these doorsets fit for your varying needs.

DURA DOOR CONSTRUCTION

Edge banded & laminated LVL frame architrave

Edge banded & laminated LVL frame

Tubular core door with LVL stile & rail, HDF crossband and laminated surfacing

The MDF cross band used in the door is HMR Grade (High Moisture Resistant) and complies to E1 emission norms.

The glues used in the product are urea free (thereby leading to a better indoor air quality)

DURA OFFERINGS

DOOR LEAF

The door leaf is made of a high-performance tubular core with LVL stile & rail, a matching edge banding on all four sides, and a complete laminated finish. This results in a comprehensive 6-side protection shielding the door against hostile weather conditions. The door is pretested for durability with respect to static torsion and soft & heavy body impact. It is available in thicknesses of 38mm and 44mm.

DOOR FRAME

The door frame is made up of LVL frame which complies to E1 emission standards. It carries a matching laminate surface and edge banding similar to the door leaf, thus giving a coordinated look to your vision. Available in thickness of 45mm including the door stopper. The width is customizable from 90mm and above.

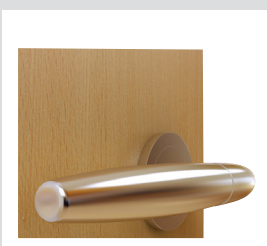

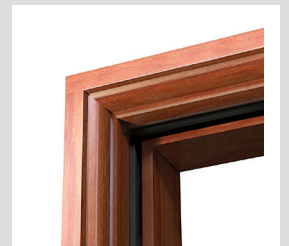

ARCHITRAVE

The architrave is used to further enhance the look of the doorset which covers the gap between the wall and the frame. It is also made up of a laminate surfaced LVL frame and is of the size 50mm x 12mm. The thickness can be customized as per your design needs.

ACOUSTIC STRIP

Dura doorsets feature a unique acoustic strip - a strip between the door and the frame which protects the door from damage during shutting and cushions it to reduce wear and tear of the door. This acoustic strip also adds to the sound dampening properties of the door.

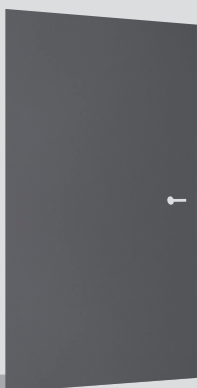

IRONMONGERY

All Mikasa hardware is of premium quality. Advanced CNC machinery recesses ironmongery like hinges, locks, drop seals, etc. to meet Mikasa's quality standards.

DURA RANGE

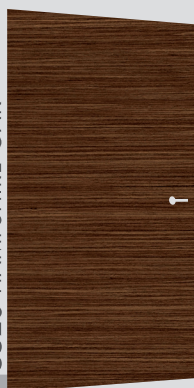

261 DARK GREY

683 GOLDEN MAPLE
